#### **GREAT GENERAL PURPOSE CLEANER:**

Sterigent is ideal for general purpose disinfection and cleaning. Its one-step germicidal properties provide excellent broad spectrum activity even in the presence of moderate amounts of organic soil.

#### **AREAS FOR USE:**

Sterigent is for use in hospitals, nursing homes, restaurants, schools, hotels... and other commercial, institutional or industrial facilities where a clean and sanitary environment is important.

#### **NONPOROUS USE:**

Sterigent has been specially formulated with low alkalinity so that when used as directed, it will not harm nonporous environmental surfaces. It is mild to the hands and can be used on all washable surfaces. This includes painted surfaces, all coverings, conductive flooring, and many other areas where high alkalinity may be detrimental.

#### **SUPERIOR DEODORANT PROPERTIES:**

The formula's high level of quaternary kills bacteria and the unpleasant odors they produce. These odor-neutralizing properties make Sterigent an excellent product for use in hotels, veterinary hospitals, kennels and nursing homes; any area where unpleasant odors are a problem.

#### **KILLS GERMS IN MINUTES :**

Effective against the following Bacteria:

- Staphylococcus aureus
- Pseudomonas aeruginosa
- Salmonella enterica

#### **APPLICATIONS:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is not be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**DISINFECTION:** For one-step cleaning and disinfecting of walls, floors and other hard nonporous surfaces, use Sterigent at 3 oz. per gallon of water (1:43). Apply with a mop, cloth or spray device.

Treated surfaces must remain wet for 10 minutes. Wipe off with a clean cloth or paper towel.

Rinsing of floors is not necessary except before application of a floor finish or polish. Preliminary cleaning is required for heavily soiled areas.

Before using this product in food processing areas, all food products and packaging materials must be removed from the room or carefully protected. After use, all food contact surfaces must be thoroughly rinsed with potable water before reuse. Do not use this product to disinfect or clean utensils, glasses, dishes, or cookware.

Prepare fresh solution for each application. For heavily soiled surfaces, a preliminary cleaning is required.

**DEODORIZATION:** When used as directed for cleaning and disinfecting (3 oz. Sterigent per gallon of water), this solution will effectively eliminate noxious odors.

#### **PRACTICAL TIPS:**

- For disinfection purposes, no more than three rooms should be cleaned with one bucket of cleaning solution. Soil overload in the cleaning bucket will reduce disinfecting properties.
- During humid weather, floors that are mopped daily need to be rinsed periodically. Rinsing will prevent the floor from becoming tacky.

**Be sure to read all Directions, Precautionary and First Aid Statements on product labels before use of this or any Spartan product. If questions remain, consult your employer or a physician. Material Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor or by visiting [www.spartanchemical.com](http://www.spartanchemical.com).**

#### **SPECIFICATIONS:**

pH (Concentrate)– 9.1 - 9.2

Color – Pink

Stability:

a.Shelf @ 24°C/75°F – One year minimum

c.Freeze/Thaw – Three cycles

Contains biodegradable detergents

EPA Reg. No. 5741-2
